## Havells-Sylvania's sets new LED benchmark

Last year's launch of Havells-Sylvania's Hi-Spot RefLED 350lm ES50 marked an innovation in LED technology, as it was the first LED retrofit with a light output to directly replace a 50W halogen. The company has now developed this product range further with the creation of the Hi-Spot RefLED ES50 350lm dimmable version.

The lamp is manufactured at Sylvania's state-of-the-art facility in Tienen, Belgium, and is a direct 5.5W LED replacement to the 50W halogen. The product offers exceptional performance of 350 lumen output and up to 25,000 hours of life.

"Last year we successfully launched the innovative Hi-Spot RefLED 350lm ES50, and we have been extremely

impressed with the success of this product," says Peter Dillen, Havells-Sylvania's strategic business unit director LED. "But at Havells-Sylvania, we never stop striving to develop new replacement products. The dimmable version reaffirms our position as the leading lamp company within the reflector field."

The Hi-Spot RefLED ES50 dimmable is available in the same versions as its non-dimmable partner – 2700K Homelight, 3000K Warm White and 4000K Cool White colours with beam angles of either 25° or 40°. The 25° delivers 1200 candela, and the 40° delivers 600 candela in all colour temperatures.

## Elstead's display of decorative luxury

Established for over 45 years, Elstead Lighting is a manufacturer and supplier of decorative hospitality lighting. The company displayed many of its attractive new chandeliers, wall lights and portable lights from USA brands Feiss, Hinkley, Quoizel, and Flambeau

Collections at January's Interiors UK show.

Elstead is due to open its new showroom in the early part of this year, where more than 1000 light fixtures will be on display.

## Baroncelli's slender style

Tito Too pendant lights, Baroncelli

Representing one of Baroncelli's most state-of-the-art designs, pieces in the Tito family of lights feature hand-blown ambrà sucro shades and stained bronze metal finishes. The end result generates a bold statement, lighting up the space with a soft, warm glow.

The tall, slender shape of the Tito table lamp exudes elegance. The base is available in stained-bronze, satin-chrome or satin-galvanised finishes. One of Baroncelli's trademarks is highlighting the expert metal work used within the structure of its pieces, giving an industrial-chic aesthetic.

The Tito pendant is suspended singularly, while the Saul pendant features a dual suspension and the Tito Too pendants are suspended in clusters – all designed for dramatic effect.
