CREATE YOUR PERFECT

LIVING ROOM

WITH OUR EXTENSIVE PRODUCT GUIDE

AVARICE

Outrageously expensive and unnecessarily extravagant or that perfect finishing touch for your home?

£12,990

Speed of light

Space may well be the final frontier, but with the Elio light from renowned lighting expert Mediterraneo Studio, you can enjoy the wonders of the universe from the comfort of your sofa.

The intriguingly curvaceous pendant, with its elegantly sweeping lines, will make a stellar centrepiece to any room. Inspired by scientific images of orbital paths, the space-age design wows from all angles, and will look even more cosmic when the light catches the hand-blown Murano glass rods.

Elio is part of a five-chandelier collaboration between creative director Giovanni Corrado and London's Vessel Gallery entitled 'Intuizione' – all which take Italian design to dizzying new heights.

So sit back and dream of galaxies far far away, and let the golden wonder of Elio light up your universe. At £12,990, it really is out of this world. ■
