STEP 1

Securely fix the ceiling plate into a ceiling beam/joist (or Junction box for US) using a minimum of 2 fixings. Ensure the fixings are capable of taking the relevant weight.

NOTE: SCREW FIXINGS ARE NOT SUPPLIED

STEP 2

Dress the frame with the glass curls using the threaded pins. Each fin should have two curls, one with the holes to the centre of the curl the other with the holes towards the lower end of the curl.

STEP 3

Pass the three suspension cables up through the ceiling canopy. Pre measure the desired height and use some tapes as indications.

GRIPPER AND SAFETY CAP

Each gripper will have a safety cap which needs to be unscrewed a little in order to allow the cable to pass through. To shorten a cable simply feed the cable back up into the gripper. To lengthen a cable push the loosened cap upwards and the gripper will disengage allowing the cable to pass through it.

STEP 4

Pass the three suspension cables into the gripper units. Tighten screw caps to lock grippers.

LEVELING

Level the pendant.

STEP 5

Pass the bulb holder up through the assembly and into the cord grip located in the centre of the ceiling plate.
